

# Garage Sale Final Totals

Family:

Total Sales:	
Cash Contributed: (+)	
To Reimburse: Money You Owe (-)	
Reimbursement: Money Owed to You (+)	
Total Profit:	

**Note:** Before and during the sale collect receipts from things individual families purchased to run the sale. These things include lunch, table rentals, signs ect. Add up the receipts and divide by the number of families involved to figure out how much each family owes. It is easiest to take from what is made at the end of the sale. If a family's receipts are more than the divided amount, then add the amount they should be reimbursed towards their total total sales. If their receipts are less than the divided amount then subtract the "money owed" from their total sales.

**Cash Contributed:** Is the amount of "cash" a family added to the garage sale at the beginning of the sale so you could be able to make change for buyers at the beginning of the sale.
